Subjects: Blasting, Effect of Weather Conditions
Noise Pollution
Pollution Noise, Blasting

Reference: Shannon, James J., "Weather Condition Checks Aid Public Relations at Granite Quarry," 73 Rock Products 6, June 1970, page 74.

Data: For mines located nearby local residences, blasting can sometimes be a nuisance and even cause damage. The effect of weather conditions can aggravate the problem. The company described in the article postpones shooting if there are low-level temperature inversions and wind shears in the area.
